

rosey boehm photography

digital camera workshops

This training course is specially designed to teach you how to use your compact digital camera. As a professional photographer with more than 20 years' experience my digital camera workshops will give you the knowledge and practical expertise you need to get the best from your camera.

Compact cameras

learn how to focus
master flash techniques
explore auto vs manual
understand aperture and shutter speed
learn composition techniques
practice and hone new skills
download images successfully

why do this course?

Are you confused by all the dials and buttons?
Are you frustrated by your poor quality photos?
Are you spending too much time trying to fix your mistakes?
Do you want to use your compact camera with more confidence?

course content

Held over a full day this course has a maximum of six participants, allowing for each person to receive individual attention to understand their own camera. The course covers camera settings, composition, image resolution, what makes a good photograph and how to photograph people. Downloading images and file management is also covered. Detailed course notes are provided, as well as exercises to practice and hone newfound skills.

course outcomes

This course will enable you to work quicker with more creative compositions. Your photographs will be sharper and in focus. The emphasis of this course is to learn how to get good results from the start, reducing the need for digital manipulation. Participants will be able to better utilise their digital cameras to improve the overall quality of their photography.

- ★ SLR camera course is also available.
- ★ Please contact Rosey for further information or to make a booking.
