Now there is a training course specially designed to teach you how to use your digital camera. As a professional photographer with more than 20 years experience my 'Better Digital Photography' workshop gives you the knowledge and practical expertise to make the most of your camera.

- ★ This course can be customised to meet the specific needs of your department.
- ★ For your convenience I will come to your workplace.

#### Why do this course?

Do you take photographs for newsletters, displays, marketing or presentations?  
Are you confused with all the dials and buttons?  
Are you frustrated with your poor quality photos?  
Are you spending time trying to fix your mistakes?  
Do you want to use your camera to a greater capacity?

#### Course Content

The course is held over one day with a maximum of 6 participants. Each person is given individual attention to understand their own camera. The course covers camera settings, composition, image resolution, what makes a good photograph and how to photograph people. Downloading images and file management is also covered. Detailed course notes are provided as well as practical exercises to practice new skills.

#### Course Outcomes

The participants in my courses have new confidence and skills. They are able to work quicker with more creative compositions. Their photographs are also sharper and in-focus. The emphasis of this course is learn how to get good results in the beginning reducing the need for digital manipulation.

#### Follow up

After completion of my course I return to the workplace for a follow up session to resolve problems with your photography. (In country areas this may only be available on line)

I am confident this course will enable you to better utilize your digital camera and improve the overall quality of your photography. I have been conducting this very successful program to government agencies, community groups and individuals for over 4 years.

This course is available in country offices.
